

### CONCEPT

All EAP events are international and offer the same quality standard.  
Our **CIRCLES** show their **POLE OF ATTRACTIVENESS**.

In other words :  
**where do MOST (~50-to 70% or more) of the ATHLETES COME FROM.**  
Attractiveness shows the meeting's key role in the development and promotion in a defined area.

- Small / Medium pole**  
(~ 70% of the athletes comes within an area of 200 to 400km)
- Large pole**  
(~ 60% of the athletes comes within an area of 400 to 900km)
- Extra-Large pole**  
(~ 50% of the athletes comes within an area of 900 to 1,500 km or more)

(1) The amount depends on the number of delegations and athletes participating in the EAP, but does not exceed the predefined S/M, L, or XL budget (unless otherwise agreed between the parties). Not to mention the shuttles.  
(2) The amount depends on the number of delegations and athletes participating in the EAP, as well as accommodation costs. It is purely indicative and depends on the hotel chosen by the organiser.  
(3) This amount has no real value, as it depends on several factors that can vary considerably from one meeting to another, such as the cost of booking the stadium, communication costs, live broadcasting, the purchase of prizes or medals, the number of international athletes (excluding EAP) participating, printing of bibs, anti-doping controls, prize-money (WACT), equipment and supplies for volunteers, and of course the support of the city, the region, the federation, partners and sponsors. But below this minimum overall budget, it seems illusory to organise an international EAP meeting.
